

Theoretical User Case Four

Security and Compliance Consultancy - Proof Chain Use

Description

An IT security compliance consultancy assess businesses and organisations for risk. The service they provide is to analyze the operations model and design programs to enhance security and lower risk. Making sure their clients comply with PCI, HIPAA, GLBA, FISMA, ISO 27002 and other security compliance mandates more efficiently and effectively, as well as to help them recover from and prepare for cyber security breaches.

They recognize that during their security compliance assessments they see data sets in their clients systems that can benefit from being stored on immutable proof chains.

To help their clients they have become a partner and reseller for Evident.

Potential benefits for their clients

- Data which cannot be destroyed or hacked
- Risk Management
- Evidence produced automatically
- Compliance: ISO, UK "Official", Sarbanes-Oxley, PCI, HIPAA, GLBA, FISMA, ISO 27002
- Dispute ready Proof Certificates for events
- Reports/Auditing Service/Proof Certificates/Proof Tokens.
